The 7th International Conference on Science and Applied Science 2022

31 October 2022, Universitas Sebelas Maret
Surakarta, Central Java, Indonesia

The 7th International Conference on Science and Applied Science (ICSAS 2022)

Monday, 31 October 2022

Universitas Sebelas Maret, Central Java, Indonesia

Background

The ICSAS 2022 conference is aimed to bring together scholars, leading researchers and experts from diverse backgrounds and applications areas in Science. Special emphasis is placed on promoting interaction between the science theoretical, experimental, and Education Sciences, engineering so that a high level exchange in new and emerging areas within Mathematics, Chemistry, Physics, and Biology, all areas of sciences and applied mathematics and sciences is achieved.

Topics of Interest

1. Physics
2. Mathematics
3. Chemistry
4. Biology
5. Educational Physics
6. Educational Mathematics
7. Educational Chemistry
8. Educational Biology
9. Natural Science Education
10. Materials Engineering
11. Chemical Engineering
12. Civil Engineering

Organizer

UNS
UNIVERSITAS
SEBELAS MARET

Physics Department, Graduate Program
Faculty of Mathematics and Natural Sciences,
Universitas Sebelas Maret, Indonesia

The 7th International Conference on Science and Applied Science

31 October 2022, Universitas Sebelas Maret
Surakarta, Central Java, Indonesia

COMMITTEES

Organizer

Physics Department, Graduate Program,
Faculty of Mathematics and Natural Sciences, Universitas Sebelas Maret
Jl. Ir. Sutami 36A Kentingan Jebres Surakarta 57126, Indonesia
Email: icsas@mail.uns.ac.id

Chairman

Prof. Dr. Eng. Budi Purnama, S.Si, M.Si., Universitas Sebelas Maret, Indonesia

Organizing Committee

1. Prof. Drs. Cari, M.A., M.Sc., Ph.D., Universitas Sebelas Maret, Indonesia
2. Prof. Dra. Suparmi, M.A., Ph.D., Universitas Sebelas Maret, Indonesia
3. Dr. Fuad Anwar, S.Si., M.Si., Universitas Sebelas Maret, Indonesia
4. Ahmad Marzuki, S.Si., Ph.D., Universitas Sebelas Maret, Indonesia
5. Drs. Harjana, M.Si. M.Sc., Ph.D., Universitas Sebelas Maret, Indonesia
6. Prof. Dr. Agus Supriyanto, S.Si., M.Si., Universitas Sebelas Maret, Indonesia
7. Budi Legowo, S.Si, M.Si., Universitas Sebelas Maret, Indonesia
8. Artono Dwijo Sutomo, S.Si., M.Si., Universitas Sebelas Maret, Indonesia
9. Dr. Eng. Kusumandari, S.Si, M.Si., Universitas Sebelas Maret, Indonesia
10. Dr. Fahru Nurosyid, S.Si., M.Si., Universitas Sebelas Maret, Indonesia
11. Dr. Yofentina Iriani, S.Si., M.Si., Universitas Sebelas Maret, Indonesia
12. Dr. Eng. Risa Suryana, S.Si, M.Si., Universitas Sebelas Maret, Indonesia
13. Khairuddin, S.Si., M.Phil, Ph.D., Universitas Sebelas Maret, Indonesia
14. Drs. Iwan Yahya, M.Si., Universitas Sebelas Maret, Indonesia
15. Mohtar Yuniarto, S.Si, M.Si., Universitas Sebelas Maret, Indonesia
16. Prof. Nuryani, S.Si, M.Si, Ph.D., Universitas Sebelas Maret, Indonesia
17. Dewanta Arya Nugraha, S.Pd., M.Pd., M.Si., Universitas Sebelas Maret, Indonesia

Abstract. Leather jacket is the most popular fashion clothes made of garment leather. Garment leather generally derived from cattle, goat, sheep or pig skin. Muslim countries, including Indonesia, prohibit (haram) the products that derived from pig materials. If there are no labels on these products the costumers unable to find out the raw materials in leather products. Several techniques such as HPLC, PCR, GC-MS, electronic nose, and FTIR spectrophotometers have been carried out to distinguish the raw materials. The FTIR method is regarded as being affordable and simple to utilize. This study aims to evaluate the FTIR method coupled to chemometrics to distinguish the raw materials in leather garment. Lipid extracts derived from the various raw skin and leather garment were scanned using an FTIR spectrophotometer at 4000–450 cm^{-1} . There is the differentiation of spectral in two range of wavenumbers (3000-2800 cm^{-1} and 1200-1000 cm^{-1}). The FTIR spectroscopy coupled to chemometrics can distinguish pig skin, sheep skin, pig garment and sheep garment through specific peaks in infrared spectra. This can be used as an initial analysis on determining the existence of skin adulteration in leather garment.
