

INTISARI

Kegiatan pelaksanaan Tugas akhir dilaksanakan di Cv.RnD Leather Magetan yang berada di Jl.Teuku umar no.05 ,Magetan ,Jawa Timur. Kegiatan Tugas akhir ini penulis mengambil proses *finishing* yang bertujuan untuk mengetahui secara langsung proses *finishing* menggunakan vaselin dan mengetahui kualitas kulit *pull up finished* serta hasil uji kulit *pull up finished* pada penggunaan vaselin pada lapisan *base coat*. Dalam pelaksanaan *finishing* kulit *pull up*, penulis melakukan metode *trial* di CV RnD Leather yaitu memanfaatkan vaselin yang digunakan pada lapisan *base coat*. Bahan baku yang digunakan yaitu kulit sapi *crust dyed* dengan kualitas D ,warna pink, tebal 1,5 mm dan luas kulit 10 *sqft*. Proses *finishing* artikel *pull up* ada beberapa tahapan yaitu Sortasi dan *Grading*, *Buffing*, *Base coat*, *Medium coat*, *Top coat*, dan *Plating*. Hasil akhir dari kulit *pull up finished* memiliki kualitas B yaitu memiliki efek *light pull up*, warna rata, tidak memiliki cacat pada bagian penting, kulit padat dan kulit telah memenuhi standart secara uji organoleptis yang meliputi kerataan warna, kondisi kulit, dan kilap. Dapat disimpulkan bahwa vaselin dapat digunakan untuk proses *finishing* kulit *pull up* yang memiliki kandungan *wax* maupun *oil* yang dapat memunculkan efek *pull up*.

Kata kunci : *finishing*, *pull up*, *vaselin*, *petroleum*, *base coat*.

Abstrac

The final project implementation activities were carried out at Cv.RnD Leather Magetan, which is located on Jl.Teuku umar no.05, Magetan, East Java. In this final project, the writer takes the finishing process which aims to directly determine the finishing process using Vaseline and to know the quality of the pull up finished skin and the results of the pull up finished skin test on the use of Vaseline on the base coat layer. In implementing the pull-up leather finishing, the author conducted a trial method on CV RnD Leather, which used Vaseline used in the base coat layer. The raw material used is crust dyed cowhide with quality D, pink color, 1.5 mm thick and 10 sqft of leather. The process of finishing the pull up article has several stages, namely Sorting and Grading, Buffing, Base coat, Medium coat, Top coat, and Plating. The end result of the pull up finished skin has B quality, which has a light pull up effect, even color, has no defects in important parts, the skin is solid and the skin has met the standards in the organoleptic test which includes evenness of color, skin condition, and gloss. It can be concluded that Vaseline can be used for the finishing process of pull up skin which contains wax or oil which can cause a pull up effect.

Keywords: finishing, pull up, vaseline, petroleum, base coat.
